12/3/2025

**To the Operators and Users of
TVP244 SAM / Speed and Mileage Measurement Systems (WME)**

**Subject:
Discontinuation of TVP244 SAM / Speed and Mileage Measurement Systems (WME)
(Windows based, delivered before 31.12.2024) and their Subproducts – End of Service Life
(EOSL)**

Dear Sir or Madam,

As the developer of the TVP244 SAM/ Speed and Mileage Measurement Systems (WME), I hereby inform you on behalf of DB Systemtechnik GmbH that, in accordance with our End-of-Service-Life (EOSL) policy, we are announcing the discontinuation of technical support and services for the following products:

Figure 1: SAM / Speed and Milage Measurement System (WME)

Product description

End of Service Life Datum

TVP244 SAM/ Speed and Mileage Measurement System (WME)

31.12.2024

(Windows based, delivered before 31.12.2024)

Sub-products of the TVP244 series

31.12.2026

The discontinuation is carried out for the following reasons (see Table 1):

Table 1: Discontinuation Table

Product Name (Components/SW/HW)	Reason for Discontinuation / Remarks	End of Life / Service Date
SAM/ Speed and Mileage Measurement System (WME) (delivered before 31.12.2024)	Support discontinued by Microsoft	SAM / Speed and Mileage Measurement System (WME) (delivered 31.12.24)

We will continue to offer support without guaranteed error correction until 31.12.2026. After the above-mentioned date, we will no longer be able to offer technical support, spare parts, maintenance, calibration, or modifications.

Limited Service until EOSL:

Service can only be provided under restrictions and after technical evaluation.

Table 2: Countermeasures

Recommendation for Substitute/Component/SW/HW	Limited Service until End of Service / Life (EOSL)
Migration to new measurement system	The new computer operates with the old system (backward compatible)
	Measurement cards and CPU are no longer available
	No software updates (Windows) possible
	Repairs are only possible to a limited extent and require considerable time (at least 6 months)

Recommendation for successor products:

The successor system is built on a modern Linux platform, providing enhanced functionality and ensuring long-term operational stability and availability.

We are pleased to offer you technical consultation for the migration process and can provide tailored solutions to meet your specific requirements.

For any further questions or to discuss the design of a replacement concept in detail, our technical support team remains at your disposal.

Mit freundlichen Grüßen,
Best regards,

DB-Systemtechnik GmbH
