

Maintenance solutions

We design first-class maintenance solutions for you that save on costs and increase the availability of your vehicles. With our decades of experience, we can design your systems and processes to ensure that they are legally compliant.

Our services:

- Creating or modifying regulations
- Optimising maintenance programmes
- Creating qualification concepts and guidelines
- Consulting services for maintenance providers

The benefits for you:

- Increased technical availability of your vehicles and reduced failure times and idle times thanks to the further development of your maintenance processes towards corrective, proactive and condition-based maintenance with failure prediction
- Establishment of a process-oriented maintenance system in accordance with the ECM regulation according to directive 2008/110/EC and German General Railway Act (AEG) § 4a
- Legally compliant creation and further development of your maintenance system through:
 - The creation of expert reports
 - Up-to-date training for the qualification of your employees
 - Risk analysis and risk assessment of your maintenance processes
- Cost reductions through:
 - Optimisation of systems and processes
 - Optimisation of maintenance requirements and maintenance strategies
